

Implementation of EPAs

Objectives:

- 1) To identify the issues involved in implementing EPAs
- 2) To propose stages in the implementation of EPAs

Context:

- EPAs for your specialties are now available
- You need to implement the use of EPAs in your department

Brainstorming:

- From the learners and supervisors' points of view:
 - What difficulties are expected ?
 - What are the possible solutions?
 - What are the necessary step ?
- Focus on daily use rather than use for certification
